

CASE STUDY

Valley Health System Enhances Patient Care with Fully Integrated MEDITECH 6.1 EHR

“NHA came through with everyone we needed. It was amazing to see so many people come in thoroughly prepared for work.”

- Eric Carey, VP/CIO

A MEDITECH site since 1996 and LIVE with MAGIC version 5.66, Valley Health System embarked on a mission to establish an integrated electronic health record (EHR) for its current and future clinical and operational environments that would enhance patient care through the availability of real-time and integrated data. In January 2014, Valley’s senior leadership turned to NHA to **implement the full suite of MEDITECH 6.1 applications**. Their primary objective was for staff to work collaboratively as a team across both financial and clinical departments to build a system that met Valley’s expectations in terms of technology, integration and standardization for the present and future environments.

“Working with John Haffty and his team was one of the brightest spots of the MEDITECH project. From top to bottom NHA does an excellent job of keeping customer needs in mind. John is well known in the MEDITECH community and has direct, positive and influential relationships with MEDITECH and their executives. John is well known as a straight talker with an intense focus on customer service and customer satisfaction. Right out of the gate you know your relationship with NHA has a high probability for success. The bottom line is that choosing NHA will give you a high quality company with the added bonus that the NHA leadership team, all the way to John Haffty, will be there to support you and work with you to achieve your goals.”

- Eric Carey, VP/CIO

About Navin, Haffty & Associates

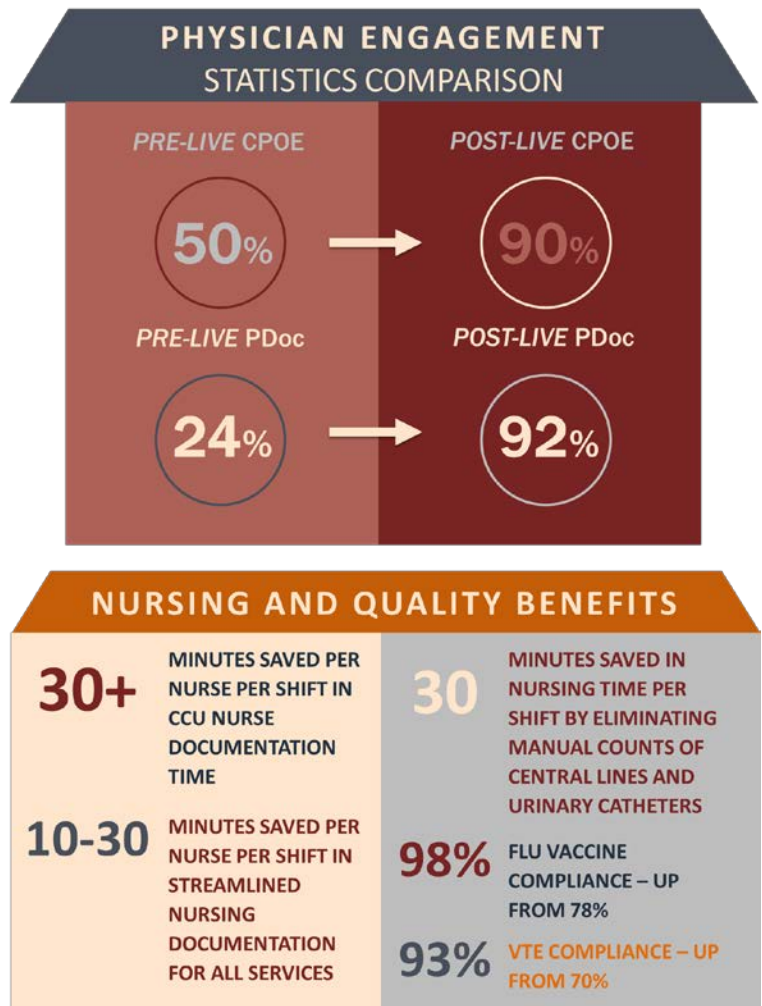

Since our inception in 2001, NHA’s sole focus is providing solutions that maximize the value of your MEDITECH EHR. Our exclusive focus has allowed us to provide

clients with greater insight and understanding of MEDITECH’s capabilities and the expertise to deliver innovative tools, solutions, and strategies that improve your operational performance and enhance patient care quality. Our proven track record of success has led to Best in KLAS awards for HIT Enterprise Implementation Leadership, Planning and Assessment and Clinical Implementation Supportive, and KLAS Category Leader for Staff Augmentation.

Benefits

NHA’s four-phase training approach, including a high level of at-the-elbow Go-LIVE support for physicians and nurses, is just one of the factors that contributed to **strong physician adoption metrics.**

Like most healthcare organizations, Valley was seeking improvement with early identification of sepsis, both in the ED and on inpatient floors. NHA played an integral role in assisting Valley with this initiative through the implementation of MEDITECH’s 6.1 Surveillance tool. In addition to the nursing and quality benefits shown above, Valley has experienced 100% of HIM-coded septic patients being identified through electronic surveillance.
